These computations require EXCELLENT record keeping. Taxpayer's who change tax preparers must be sure to maintain the proper track records. This "headache" will not be completely worked out by the computer!!!

Table and Worksheets for the Self-Employed

As discussed in chapters 2 and 4, if you are self-employed, you must use the following rate table or rate worksheet and deduction worksheet to figure your deduction for contributions you made for yourself to a SEP-IRA or qualified plan.

First, use either the rate table or rate worksheet to find your reduced contribution rate. Then complete the deduction worksheet to figure your deduction for contributions.

The table and the worksheets in chapter 5 apply only to self-employed individuals who have only one defined contribution plan, such as a profit-sharing plan. A SEP plan is treated as a profit-sharing plan. However, do not use this worksheet for SAR-SEPs.

Rate table for self-employed. If your plan's contribution rate is a whole percentage (for example, 12% rather than 12½%), you can use the table on the next page to find your reduced contribution rate. Otherwise, use the rate worksheet provided below.

First, find your plan contribution rate (the contribution rate stated in your plan) in *Column A* of the table. Then read across to the rate under *Column B*. Enter the rate from *Column B* in step 4 of the *Deduction Worksheet for Self-Employed* on this page.

Example. You are a sole proprietor with no employees. If your plan's contribution rate is 10% of a participant's compensation, your rate is 0.090909. Enter this rate in step 4 of the *Deduction Worksheet for Self-Employed* on this page.

Rate worksheet for self-employed. If your plan's contribution rate is not a whole percentage (for example, 10½%), you cannot use the *Rate Table for Self-Employed*. Use the following worksheet instead.

Rate Worksheet for Self-Employed

- 1) Plan contribution rate as a decimal (for example, 10½% = 0.105)
- 2) Rate in line 1 plus 1 (for example, 0.105 + 1 = 1.105)
- 3) Self-employed rate as a decimal rounded to at least 3 decimal places (line 1 ÷ line 2) (for example, 0.105 ÷ 1.105 = 0.095)

Figuring your deduction. Now that you have your self-employed rate from either the rate table or rate worksheet, you can figure your maximum deduction for contributions for yourself by

*The deduction for annual employer contributions (other than elective deferrals) to a SEP plan, a profit-sharing plan, or a money purchase plan cannot be more than 20% of your net earnings (figured without deducting contributions for yourself) from the business that has the plan.

Example. You are a sole proprietor with no employees. The terms of your plan provide that you contribute 8½% (.085) of your compensation to your plan. Your net profit from line 31, Schedule C (Form 1040) is \$200,000. You have no elective deferrals or catch-up contributions. Your self-employment tax deduction on line 27 of Form 1040 is \$9,300. See the filled-in portions of both Schedule SE (Form 1040), Self-Employment Income, and Form 1040, later.

You figure your self-employed rate and maximum deduction for employer contributions you made for yourself as follows.

See the filled-in Deduction Worksheet for Self-Employed on this page.

Rate Worksheet for Self-Employed

- 1) Plan contribution rate as a decimal (for example, 10½% = 0.105) 0.085
- 2) Rate in line 1 plus 1 (for example, 0.105 + 1 = 1.105) 1.085
- 3) Self-employed rate as a decimal rounded to at least 3 decimal places (line 1 ÷ line 2) (for example, 0.105 ÷ 1.105 = 0.095) 0.078

completing the *Deduction Worksheet for Self-Employed*.

Community property laws. If you reside in a community property state and you are married

and filing a separate return, disregard community property laws for step 1 of the *Deduction Worksheet for Self-Employed*. Enter on step 1 the total net profit you actually earned.

Worksheet 1-5. Figuring the Taxable Part of Your IRA Distribution

Keep for Your Records

Use only if you made contributions to a traditional IRA for 2009 and have to figure the taxable part of your 2009 distributions to determine your modified AGI. See [Limit if Covered by Employer Plan](#).

Form 8606 and the related instructions will be needed when using this worksheet.

Note. When used in this worksheet, the term **outstanding rollover** refers to an amount distributed from a traditional IRA as part of a rollover that, as of December 31, 2009, had not yet been reinvested in another traditional IRA, but was still eligible to be rolled over tax free.

1. Enter the basis in your traditional IRAs as of December 31, 2008	1.	
2. Enter the total of all contributions made to your traditional IRAs during 2009 and all contributions made during 2010 that were for 2009, whether or not deductible . Do not include rollover contributions properly rolled over into IRAs. Also, do not include certain returned contributions described in the instructions for line 7, Part I, of Form 8606.	2.	
3. Add lines 1 and 2	3.	
4. Enter the value of all your traditional IRAs as of December 31, 2009 (include any outstanding rollovers from traditional IRAs to other traditional IRAs). Subtract any repayments of qualified disaster recovery assistance or recovery assistance distributions	4.	
5. Enter the total distributions from traditional IRAs (including amounts converted to Roth IRAs that will be shown on line 16 of Form 8606) received in 2009. (Do not include outstanding rollovers included on line 4 or any rollovers between traditional IRAs completed by December 31, 2009. Also, do not include certain returned contributions described in the instructions for line 7, Part I, of Form 8606.) Include any repayments of qualified disaster recovery assistance or recovery assistance distributions	5.	
6. Add lines 4 and 5	6.	
7. Divide line 3 by line 6. Enter the result as a decimal (rounded to at least three places). If the result is 1.000 or more, enter 1.000	7.	
8. Nontaxable portion of the distribution. Multiply line 5 by line 7. Enter the result here and on lines 13 and 17 of Form 8606	8.	
9. Taxable portion of the distribution (before adjustment for conversions). Subtract line 8 from line 5. Enter the result here and if there are no amounts converted to Roth IRAs, stop here and enter the result on line 15a of Form 8606	9.	
10. Enter the amount included on line 9 that is allocable to amounts converted to Roth IRAs by December 31, 2009. (See <i>Note</i> at the end of this worksheet.) Enter here and on line 18 of Form 8606	10.	
11. Taxable portion of the distribution (after adjustments for conversions). Subtract line 10 from line 9. Enter the result here and on line 15a of Form 8606	11.	

Note. If the amount on line 5 of this worksheet includes an amount converted to a Roth IRA by December 31, 2009, you must determine the percentage of the distribution allocable to the conversion. To figure the percentage, divide the amount converted (from line 16 of Form 8606) by the total distributions shown on line 5. To figure the amounts to include on line 10 of this worksheet and on line 18, Part II of Form 8606, multiply line 9 of the worksheet by the percentage you figured.

distributions are shown in boxes 1 and 2a of Form 1099-R. A number or letter code in box 7 tells you what type of distribution you received from your IRA.

Number codes. Some of the number codes are explained below. All of the codes are explained in the instructions for recipients on Form 1099-R.

- 1—Early distribution, no known exception.
- 2—Early distribution, exception applies.
- 3—Disability.
- 4—Death.

Comprehensive Example

Determining Your Traditional IRA Deduction and the Taxable Portion of Your Social Security Benefits

John Black is married and files a joint return. He is 65 years old and had 2009 wages of \$88,500. His wife did not work in 2009. He also received social security benefits of \$12,000 and made a \$6,000 contribution to his traditional IRA for the year. He had no foreign income, no tax-exempt interest, and no adjustments to income on lines 23 through 36 on his Form 1040. He participated in a section 401(k) retirement plan at work.

John completes worksheets 1 and 2. Worksheet 2 shows that his 2009 IRA deduction is \$3,090. He must either withdraw the contributions that are more than the deduction (the \$2,910 shown on line 8 of Worksheet 2), or treat the excess amounts as nondeductible contributions (in which case he must complete Form 8606 and attach it to his Form 1040).

The completed worksheets that follow show how John figured his modified AGI to determine the IRA deduction and the taxable social security benefits to report on his Form 1040.

Comprehensive Example

Determining Your Traditional IRA Deduction and the Taxable Portion of Your Social Security Benefits

John Black is married and files a joint return. He is 65 years old and had 2009 wages of \$88,500. His wife did not work in 2009. He also received social security benefits of \$12,000 and made a \$6,000 contribution to his traditional IRA for the year. He had no foreign income, no tax-exempt interest, and no adjustments to income on lines 23 through 36 on his Form 1040. He participated in a section 401(k) retirement plan at work.

John completes worksheets 1 and 2. Worksheet 2 shows that his 2009 IRA deduction is \$3,090. He must either withdraw the contributions that are more than the deduction (the \$2,910 shown on line 8 of Worksheet 2), or treat the excess amounts as nondeductible contributions (in which case he must complete Form 8606 and attach it to his Form 1040).

The completed worksheets that follow show how John figured his modified AGI to determine the IRA deduction and the taxable social security benefits to report on his Form 1040.
